PROFESSIONAL SUMMARY

Results-driven Software Developer with 2 years of experience designing, developing, and maintaining enterprise web applications across HR, education, and business domains. Skilled in building scalable, secure, and high-performance software using Java, ReactJS, RESTful APIs, and relational databases. Experienced in collaborating within Agile teams to deliver reliable software solutions throughout the software development lifecycle. Passionate about solving complex problems and continuously learning modern software engineering practices.

TECHNICAL SKILLS

Frontend: ReactJS, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Next.js, Tailwind CSS

Backend: Java, ASP.NET MVC, RESTful APIs, Cloud APIs

Databases: MySQL, PostgreSQL, SQL Server

Security: JWT Authentication

Tools & DevOps: Git, Azure DevOps, Postman, JIRA

IDE & Utilities: Visual Studio, Visual Studio Code

Design & UI: Figma (UI implementation), Component-based UI Development

Familiar with: MongoDB, AWS, Docker, Kubernetes, CI/CD, Data Warehousing

EDUCATION

Master of Computer Applications (MCA)

Dr. Babasaheb Ambedkar Marathwada University, India | 2023

Bachelor of Computer Science (B.Sc. Computer Science)

Dr. Babasaheb Ambedkar Marathwada University, India | 2021

PROFESSIONAL EXPERIENCE

Software Developer | Click Crawl Media Private Limited | April 2024 – Present

- Developed and maintained enterprise web applications for HR, education, and business operations by designing RESTful APIs, optimizing relational databases, and implementing secure authentication mechanisms, resulting in improved process automation and system reliability
- Collaborated with cross-functional teams throughout the Agile software development lifecycle to deliver scalable, high-quality software solutions, while enhancing application performance, security, maintainability, and overall user experience.

HR Management System (HRMS)

Role: Full Stack Developer

- Developed a comprehensive HRMS to automate employee lifecycle processes, including attendance, payroll, leave, recruitment, and employee management, reducing manual HR operations and improving organizational efficiency.
- Built secure, scalable modules with role-based access, interactive dashboards, and reporting features to support data-driven HR decision-making.

College Management System

Role: Full Stack Developer

- Developed a centralized College Management System to streamline student admissions, attendance, academic records, faculty management, and administrative operations.
 - Improved institutional efficiency by digitizing academic workflows, enabling real-time data access, and reducing manual record management.
-

PROJECTS

Java Quiz Application

Role: Java Developer

- Developed a console-based Quiz Application using Java and Object-Oriented Programming (OOP) principles to automate quiz creation, answer evaluation, score calculation, and result generation, providing an efficient and interactive assessment platform.
- Designed a modular and maintainable application architecture using the Java Collections Framework and exception handling, improving application reliability, scalability, and enabling future feature enhancements with minimal code changes.
